SUMMARY

Quality Engineering and Assurance leader with 15+ years of experience across enterprise test automation, delivery management, automation consulting, client servicing and pre-sales. Currently a Senior QA Manager, with a career progression from Project Engineer through Test Lead and QA Manager into senior leadership. Combines hands-on technology depth with portfolio planning, automation strategy, roadmap definition, quality improvement, cost optimization, mentoring and cross-functional delivery. Experienced across GUI, API, E2E, large-solution, service virtualization, build verification, CI and performance testing

EXPERIENCE

Sr. QA Manager

Concord Technologies

📅 02/2023 - Present

- Lead quality engineering and test automation initiatives, aligning automation strategy, delivery planning, governance and technical execution with client and business objectives
- Drive Test automation and helping drive continuous improvement in automation practices
- Responsible for End to End Automation Framework(2000+ regression and smoke test cases)

Quality Assurance Manager

TCS

📅 01/2014 - 01/2023

- Managed quality and automation delivery for large US client portfolios, covering multiple automation and testing workstreams
- Planned resources, forecasts, deliverables and execution for test automation services across business functions
- Initiated and managed large automation testing programs in Agile environments, coordinating multiple workstreams, business problem resolution, cost optimization and mentoring

Test Lead

Cognizant Technology Solutions

📅 12/2009 - 12/2013

- Led test engineering activities and supported automation delivery across client engagements, building on a strong foundation in automation and quality assurance
- Worked with cross-functional teams to plan, execute and improve testing activities while supporting delivery objectives

Project Engineer

Polaris Software Lab Ltd

📅 08/2006 - 11/2009

- Built foundational experience in software engineering and quality assurance, progressing into test leadership and automation-focused responsibilities
- Managed and maintained TeamSite CMS to ensure seamless content publishing workflows across multiple digital platforms
